

Slim Detachable Keyboard

BASIC OPERATION GUIDE

INTRODUCTION

Thank you for acquiring the slim detachable keyboard (ACC-KB323-B1/ACC-KB323-M1) designed for the DT323RP Rugged Tablet and 323MD Medical Rugged Tablet. With this slim detachable keyboard, the tablet can easily transform from tablet to laptop and thus allows for working on the go in any desired scenarios. The magnetic hinge design eliminates the hassle for switching and pairing, making assembly an easy task. The keyboard itself can also serve as a shielding cover when being attached and folded onto the tablet screen, adding an extra layer of protection to safeguard your important device.

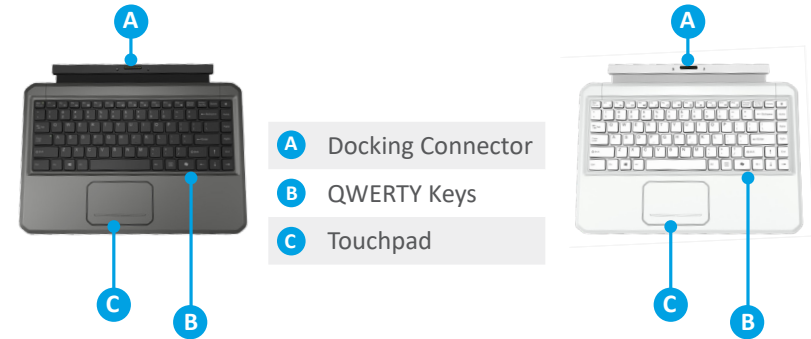

PACKAGE CONTENTS

1. One slim detachable keyboard

Features

- LED backlit with five levels of brightness
- IP65-rated dust and water resistant for any harsh environment
- Magnetic docking connector design for quick connection with tablet
- Support Copilot key for working efficiently
- White and red dual colors backlit
- Antimicrobial enclosure (ACC-KB323-M1)

The Slim Detachable Keyboard

Using the Slim Detachable Keyboard with the Tablet

- 1 Attach the slim detachable keyboard to the DT323RP tablet and make sure to align the docking connector. The Keyboard and Tablet will magnetically connect and automatically function together.

Note: Battery or external power supply is not required to use the Keyboard.

- 2 Fold the kickstand and keyboard toward the DT323RP tablet for portability and as a protective cover to shield the screen.
