

How to make OS regularly reboot

Background:

Customer wants to reboot OS everyday, but can't accept 30 minutes off for the players via power off/power on schedule setting.

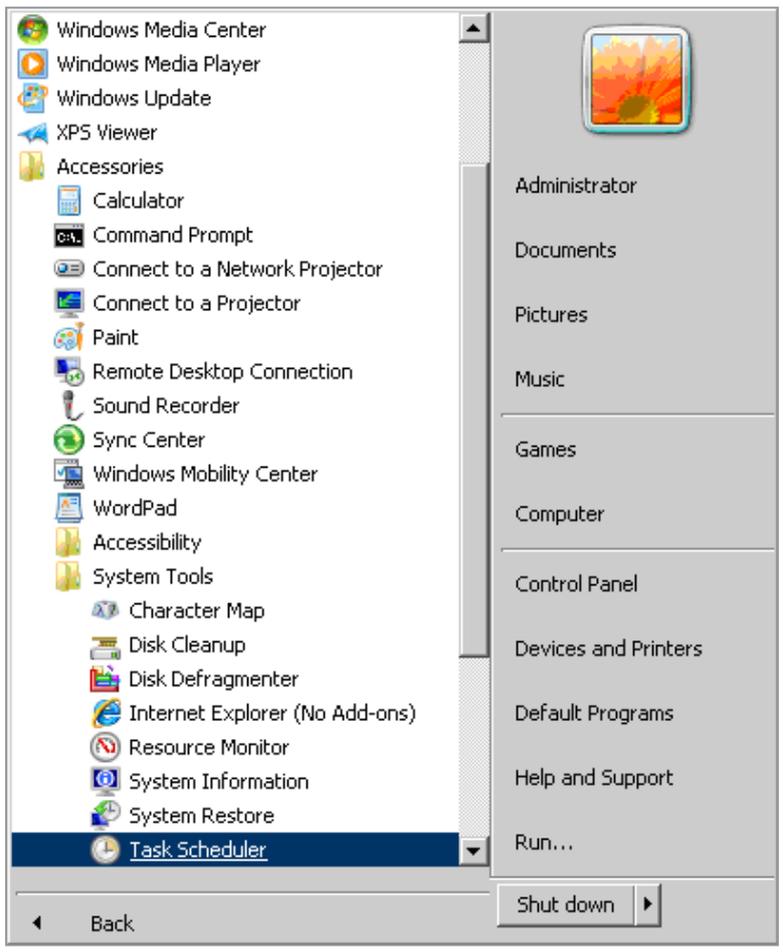

Solution:

Use Windows Task Scheduler to reboot OS everyday.

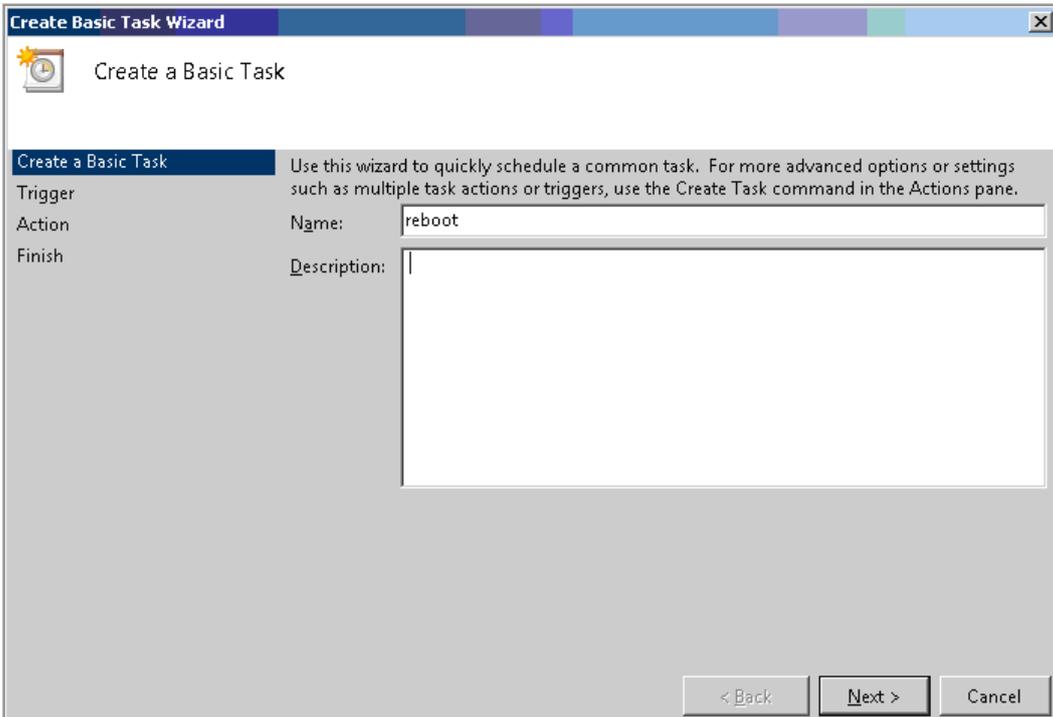

Steps:

NOTE:
The sample is for DT device with WES7 OS, you can use similar steps for DT device with XPE OS.

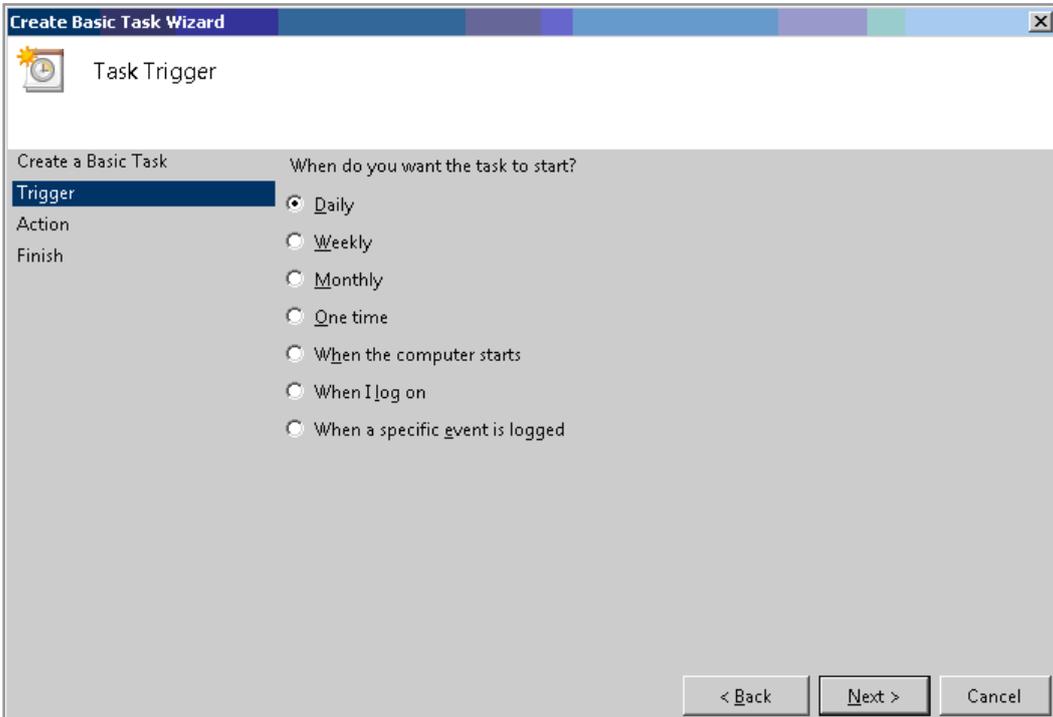

1. Open Task Scheduler from start->All Programs->Accessories->System tools->Task Scheduler.

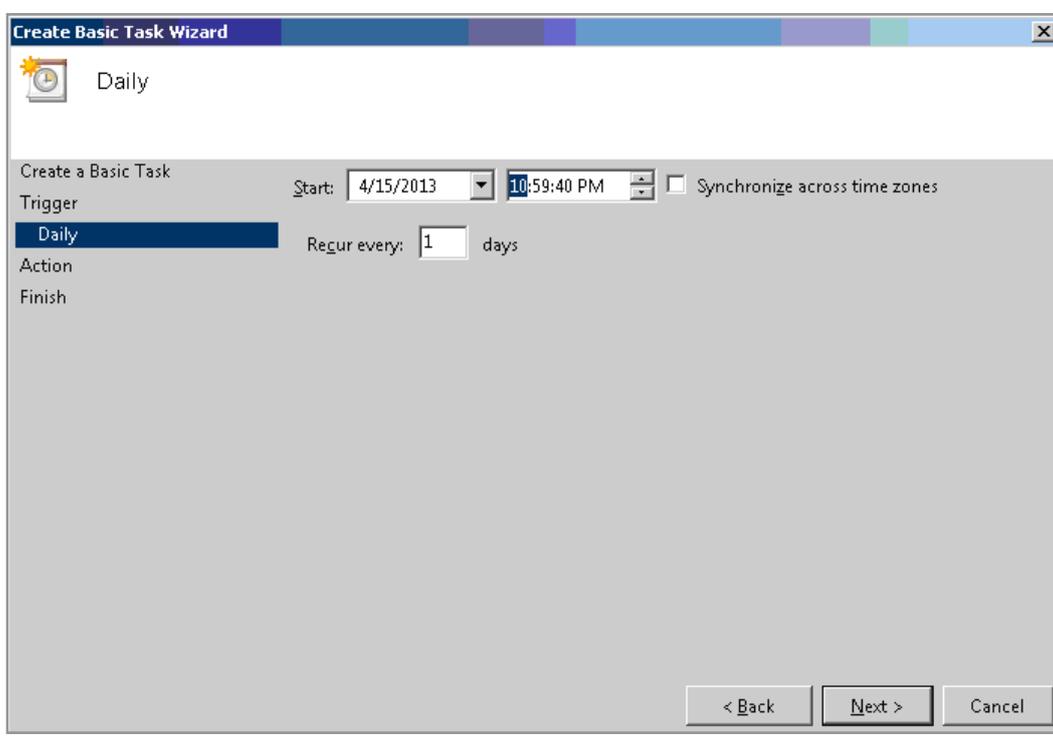

2. New a Basic Task via Create Basic Task Wizard. Input the task name then click Next button.

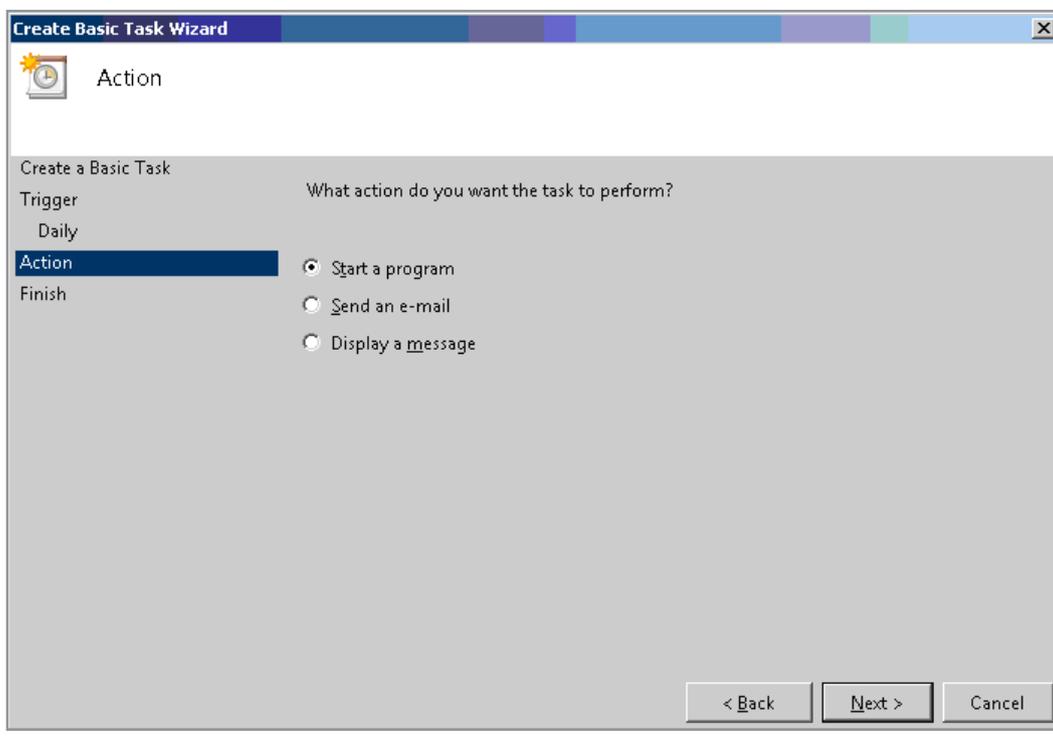

3. Select Daily then click Next button.

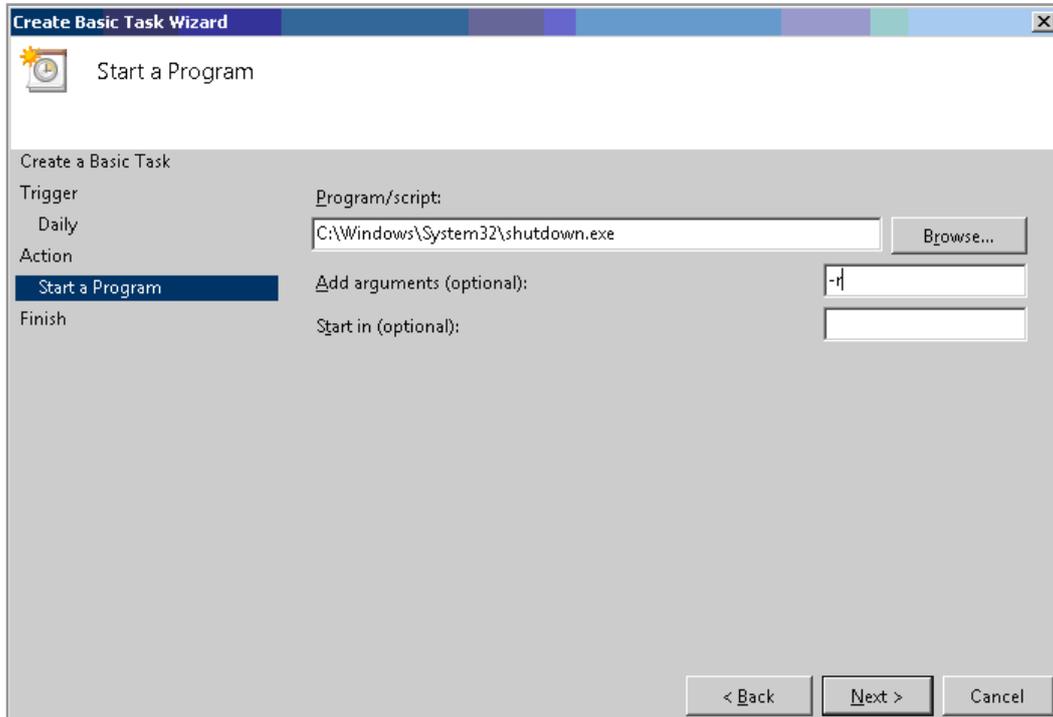

4. Set the start time, please set it carefully because OS will reboot at this time everyday. Then click Next button.

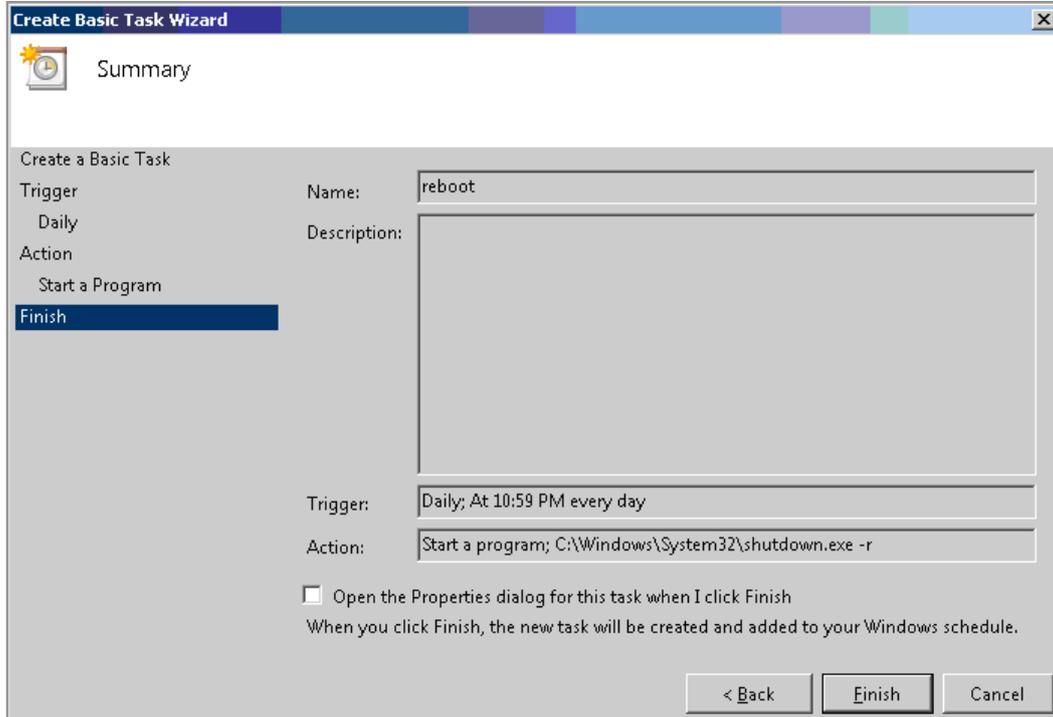

5. Select Start a program then click Next button.

- 6. Input or find "C:\Windows\System32\shutdown.exe" via Browse button. Input "-r" in Add arguments filed. Then click Next button

- 7. In this page, check the setting is what you want then click Finish button.

From now, the OS will reboot automatically everyday at the time set by you.
